## How To Teach Yourself Graphic Design In 5 Easy Steps

With so many design **resources available** here on Freepik, you might be **wondering** how you can learn to make some designs of your own. Perhaps you'd like to make some graphics for your website, or you'd like to **contribute** some design work to a resource website. No matter your **motivation**, learning graphic design can seem **tedious** or even **unattainable**. I'm here to tell you that learning graphic design is nothing to **fear**! You may be **intimidated** by the applications designers use or the **expense** of design courses, but there are many resources available for free. Let's take a look at the process of teaching yourself graphic design.

### Step 1: Find Reliable Resources For Graphic Design Information

Like I previously stated, there are **several** websites that **offer** graphic design resources and information. Not all the information you find on the internet is **reliable**, which means you'll need to do some **investigating** to find the best online resources. Freepik strives to bring you helpful information from

**trusted** sources. It's important to trust the source of any information that you get online.
